## PROFESSIONAL SUMMARY

Cybersecurity Engineering student with hands-on experience in Web Application VAPT, Ethical Hacking, Network Security, and Full-Stack Development. Skilled in vulnerability identification, penetration testing, and security risk analysis using industry-standard tools. Active CTF competitor with national-level rankings. Experienced in leading development teams and delivering end-to-end software solutions.

## EDUCATION

|                                                                                     |                     |
|-------------------------------------------------------------------------------------|---------------------|
| <b>B.Tech in Computer Science Engineering (Cyber Security) — Currently Pursuing</b> | 2024 – 2027         |
| Madanapalle Institute of Technology and Science (MITS)   CGPA: 8.83                 |                     |
| <b>Diploma in Computer Engineering</b>                                              | Jun 2021 – Apr 2024 |
| Loyola Polytechnic (YSRR), Pulivendula, Andhra Pradesh   87.82%                     |                     |
| <b>SSC (10th Grade)</b>                                                             | Jun 2016 – Jun 2021 |
| ZPHS Boys High School   CGPA: 9.3                                                   |                     |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                             |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>MERN Stack Development Intern — GND Solutions India Pvt. Ltd., Bengaluru</b>                                                                                                                                                                                                                             | Nov 2023 – May 2024 |
| <ul style="list-style-type: none"><li>Led a development team as Team Leader; delivered full-stack web application features using MongoDB, Express.js, React.js, and Node.js.</li><li>Built RESTful APIs and responsive UI components; awarded Rising Star Award for outstanding team performance.</li></ul> |                     |
| <b>Cybersecurity and Networking Virtual Intern — Cisco Networking Academy</b>                                                                                                                                                                                                                               | Jun 2025 – Aug 2025 |
| <ul style="list-style-type: none"><li>Completed hands-on labs in network security, threat detection, and cybersecurity fundamentals under Cisco curriculum.</li><li>Practiced configuring firewalls, VLANs, and network monitoring tools in a simulated enterprise environment.</li></ul>                   |                     |

## PROJECTS

|                                                                                                                                                                                                                                                                                      |                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>AI Luggage Detection System</b>                                                                                                                                                                                                                                                   | Python, YOLO                           |
| <ul style="list-style-type: none"><li>Built an AI-based object detection system to identify items in luggage scans using the YOLO framework.</li><li>Trained and fine-tuned object detection models through dataset augmentation to improve detection accuracy.</li></ul>            |                                        |
| <b>MERN Stack Blogger Application</b>                                                                                                                                                                                                                                                | MongoDB, Express.js, React.js, Node.js |
| <ul style="list-style-type: none"><li>Designed and developed a full-stack blogging platform with user authentication, authorization, and role-based access control.</li><li>Built RESTful backend APIs with Node.js/Express.js and responsive UI components with React.js.</li></ul> |                                        |

## TECHNICAL SKILLS

**Programming Languages:** Python, Java, SQL  
**Cybersecurity Tools:** Burp Suite, Nmap, Wireshark, John the Ripper, ExifTool  
**Cybersecurity Domains:** VAPT, Ethical Hacking, Network Security, Digital Forensics, SOC, API and Mobile Testing, AI and IoT Security  
**Web Development:** MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, HTML, CSS  
**Operating Systems:** Windows, Linux (Kali Linux)

## CERTIFICATIONS

- Google Cloud Security — Google Cloud
- Ethical Hacker Certification — Cisco
- Cybersecurity certification — Tech Mahindra Foundation
- Front End Development — Reliance Foundation
- Cybersecurity Fundamentals — IBM SkillsBuild
- Prompt Design in Vertex AI — Google Cloud
- Database Management Essential — Udemy
- Python, Java, SQL, Problem Solving — HackerRank

## ACHIEVEMENTS AND HONORS

- 35th Rank — REDFOX CTF 2026 (National-Level Cybersecurity Capture the Flag Competition)
- Top 41 Rank — DarkCTF 2026 (Competitive Cybersecurity CTF Challenge)
- NovrozCTF 2026 — Successfully qualified and participated in international CTF competition
- 2nd Place Runner-Up — SPARC 2026 Signal Processing Virtual CTF
- 1st Prize — Department Cybersecurity Hackathon, MITS
- Winner — Multiple Hackathons, Supraja Technologies (Level 1 through Level 6)
- Rising Star Award (Team Leader) — GND Solutions India Pvt. Ltd., Bengaluru
